

The **University Hospital of Münster** is one of the leading hospitals in Germany. Such a position cannot be achieved by size and medical successes alone. The individual commitment counts above all. We need your commitment so that even with little things we can accomplish great things for our patients. There are many possibilities open for you so that you may develop with them.

The **Institute of Human Genetics** is recruiting the

Head of the Molecular Genetic Diagnostic Laboratory (f/m)
full-time 38.5 hours/week

The institute offers a broad diagnostic spectrum and has modern equipment including several NGS platforms. Quality is our topmost priority: we implemented a quality management system and are certified according to DIN EN ISO 15189. We are active in several research areas such as reproductive genetics and oncogenetics.

Your Tasks:

- human molecular genetic diagnostics
- independent preparation of diagnostic reports (requires advanced German language skills)
- continuous improvement of existing methods and establishment of novel technologies
- research in molecular genetics
- teaching in human genetics

We expect:

- several years of experience in a human molecular genetics diagnostic laboratory in a leading position
- independent research profile
- expertise in next-generation sequencing analysis and data interpretation
- experience in a broad range of standard molecular genetic methods

We offer an interesting, well-equipped, and diverse working environment in an interdisciplinary, highly qualified team of scientists and clinicians. The successful applicant will be able to shape the future molecular genetic diagnostics in our institute.

For inquiries please contact the director Univ.-Prof. Dr. med Peter Wieacker
+49 251 83 55 401 or peter.wieacker@ukmuenster.de.

We look forward to your application by email until 30. April 2017.

For more information please visit <http://humangenetik.klinikum.uni-muenster.de>.

Applications from female candidates are particularly encouraged. In the case of equal qualifications, competence and specific achievements, women will be considered on preferential terms within the framework of the legal possibilities unless reasons specific to an individual male candidate predominate. Handicapped candidates with equal qualifications will be given preference.
